

# HALDRUP

## HALDRUP SD-50

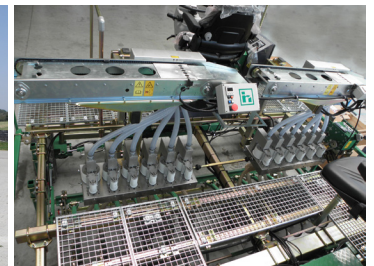

Selfpropelled Seeder

### TECHNICAL DETAILS

Engine	Lombardini 2.2 l turbo engine, 4 cylinder, watercooled 47 kW / 63 PS
Diesel tank	60 l
Speed	0 - 18 km/h
Brames	hydraulic
Tyres	front: 7.00-12 back: 7.50-16 (others on request)
Dimensions	
Length	from 3800 mm
Width	depend on track width
Height	2100 mm (w/o sun & rain protection)
Weight	from 1500 kg
Seeder parts	HALDRUP SB-25 HALDRUP SR-30 HALDRUP SP-35

The self driven plot seeder SD-50 is a modular base machine. The width can be set variably and therefore be tailored to the various needs of the growers. Due to the four-wheel drive and bigger tyres, the machine is a reliable partner even under difficult sowing conditions. As regards the Double Plot version, the efficiency is granted due to operation with only two people while the number of plots seeded is almost twice as much. The machine can be equipped with belt cone distribution as well as a magazine table system or equipped with pneumatic seed coulters allowing a precision drill. The seeder part of the tool carrier can benefit from all options available on our other seeders, the HALDRUP SB-25, HALDRUP SR-30 and HALDRUP SP-35.
